COOKING TEMPERATURE LOG

[illegible]

Target: 75°C core for 2 seconds

Probe the centre of the thickest part. If below 75°C, continue cooking and re-probe. Record corrective action if a batch fails.

Cleaning schedule

[illegible]

How to use: Initial each cell when the task is completed. Leave blank if not applicable that day. The principle: pre-clean → wash with detergent → rinse → disinfect → air dry.

BUSINESS

YEAR

Record every food safety issue and how it was resolved. EHOs check this log to assess your management confidence. An empty log suggests problems are not being recorded — not that they don't happen.
